

Vice-dean's Decree No. 06/22 on Enrolment of Courses Offered by other Faculties and Universities

Except for first year Bachelor Students, students on Bachelor or Master Programmes of the Faculty of Nuclear Sciences and Physical Engineering of the Czech Technical University in Prague (further referred to as FNSPE) can register for courses at other faculties of the Czech Technical University in Prague or even other Universities. However, they must obtain consent from FNSPE.

Applications for attending a course at another faculty or university are to be submitted to the Study Office of FNSPE. Upon approval, the course becomes part of the student's study programme as his/her optional course.

Please note that when assessing the application, it is essential that the course to be enrolled is not analogous to a course already passed, and that the level and subject of the course is in agreement with the student's study programme, and that FNSPE is not obliged to pay any tuition.

doc. Mgr. Milan Krbálek, Ph.D.

Vice-dean for Student Affairs
